

INAUGURAL BURGOS ITP CONGRESS

**20th and 21st october 2022
Burgos (Spain)**

**IN-PERSON AND VIRTUAL
CONGRESS**

PRES

PROGRAMME

Dear colleagues,

We are excited to join us for the *Inaugural Burgos ITP Congress* which will be held on 20th and 21st October 2022 in Burgos, Spain. This will be an informative two day programme featuring all aspects of ITP, chaired and delivered by key hematologists and scientists in the field of immune thrombocytopenia. This will be a dynamic mix of lectures, case reports, research updates, new drug therapies and approaches to management, along with lively debate. This will be a highly collegial meeting with full support from our industry colleagues which are helping make this whole event happen.

Our anticipation is that this will be an annual event and one which should be in all our calendars.

In terms of the audience: we are keen to involve all staff who are involved with the management of ITP including doctors and nurses, both senior and junior, along with scientists working in the field, and pharmacy staff. Our intention is to develop an holistic approach to ITP from bench to bedside. There will be a practical approach to ITP management which can be used in the delegates' day to day practice in their own institutions.

There will be plenty of Q&A sessions because we know that audiences often have many unanswered questions about ITP and we want to take full advantage of having such a great faculty in one place. We have built in lots of breaks where the delegates can network with industry colleagues as well as peers and the faculty staff.

This will be a lively, fun and memorable event. We sincerely hope you will join us in Burgos and we look forward to seeing you there!

PROGRAMME

OBJECTIVES

GENERAL OBJECTIVES:

- The scientific content of the Congress has been endorsed by ERCI (European Research Consortium on ITP).

- This congress is intended to be an informative two day programme featuring all aspects of ITP, chaired and delivered by key hematologists and scientists in the field of immune thrombocytopenia.

- Program congress will include a dynamic mix of lectures, case reports, research updates, new drug therapies and approaches to management, along with lively debate so as to make a whole review of most recent updates in ITP pathophysiology and clinics.

- To perform a gender perspective congress, specially focused on sensitivities of women and minorities

SPECIFIC OBJECTIVES:

- To provide a full and updated awareness, education and knowledge in most trending topics regarding ITP diagnosis and pathophysiology, i.e. secondary ITP, treatment and prevention of bleeding in ITP, specific challenges of ITP and women.

- To learn mechanisms of action of new drugs and therapies in development for ITP, including data from most recent clinical trials.

- To attain a full update of real world ITP data/ registries and recent data from UK.

- To obtain a full overview of ITP at any age of life including ITP in childhood and adolescence.

- To overview a general but accurate vision of ITP in this postCOVID19 pandemic era.

- To let attendees improve the quality of care of patients with ITP.
